Dear Ms Barajas-Ochoa,

I'm writing to speak out about glyphosate. As a resident of California, I do not want to be exposed to glyphosate in my food, water or any products and I want the current products that do contain glyphosate to be immediately labeled.

The current scientific data and increasing numbers of children and family members with chronic illness and cancer show us that the only ethical action is for the CAL-EPA to declare that there is NO safe level of glyphosate in California.

Sincerely,
Victoria Ashley

Vallejo, CA
